

Challenge #9: Video and Forms

In the website I created I did not include implementation of local videos because it's a portfolio website, but I link some buttons to redirect on YouTube and view some videos online. I know how to add local videos in my website but it's not included on my plan.

Below are the codes and tags on how to implement local videos in your website.

```
<video width=" " height=" " controls autoplay>
  <source src="videoname.mp4" type="video/mp4">
</video>
```

And here are my code and tags about my contact form.

```
<section class="contact" id="contact">
<div class="contact-text">
  <h2>Contact <span>Me!</span></h2>
  <h4>You can contact me at my Facebook and Gmail account.</h4>
</h2>
<p>Once again I'm Henry, thanks for watching my website.</p>
<div class="list">
  <li><a href="#">FACEBOOK</a></li>
  <li><a href="#">henrycarumba03@gmail.com</a></li>
  <li><a href="#">09978730402</a></li>
</div>
<div class="contact-icons">
  <a href="https://www.facebook.com/henry.carumba.73"><i class='bx bxl-
facebook-circle'></i></a>
  <a href="#"><i class='bx bxl-instagram-alt'></i></a>
  <a href="#"></a>
</div>
</div>

<div class="contact-form">
  <form onsubmit="sendEmail(); reset(); return false;">
    <input type="name" placeholder="Your Name" required>
    <input type="email" placeholder="Your Email Address" required>
    <input type="" placeholder="Your Mobile Number" required>
    <textarea name="" id="" cols="35" rows="10" placeholder="submit"
required>
    </textarea>
    <input type="submit" value="Send Message" class="submit" required>
  </form>
</div>
```
